

Friess Lake

Richfield J1

Planning for the Schools of Tomorrow

Friess Lake School

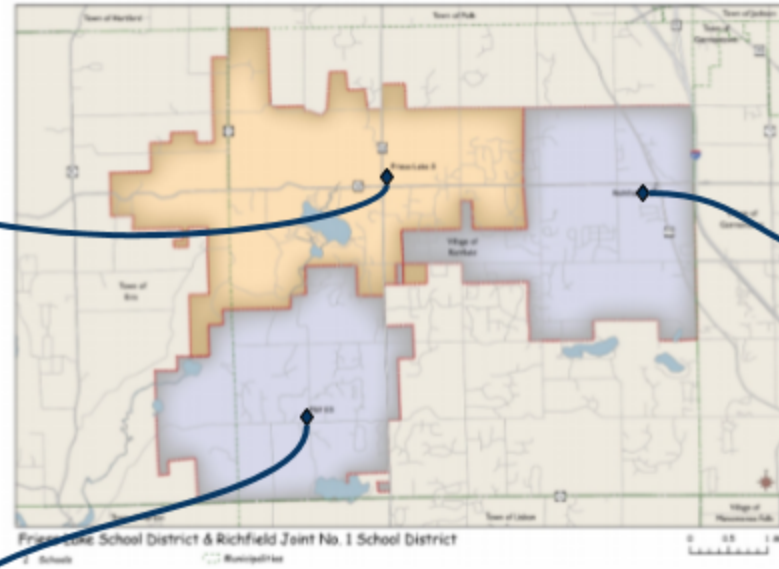

If consolidation occurs, Friess Lake School is the proposed Elementary School Site, or Grades 4K - 4 campus.

Richfield School

If consolidation occurs, Richfield School is the proposed Middle School Site, or Grades 5 - 8 campus.

Plat School

If consolidation occurs, the recommendation is to close Plat School.

Based on the current student population and future projections, as well as historical information about each building, a consolidated district would not require three facilities. Both the Friess Lake campus and Richfield campus would be able to house all 575 students. Next steps include having site-based teams from both the Friess Lake, Plat and Richfield staffs conduct walk-throughs to best identify campus layout/grade level room assignments. Additionally, students, staff, parents and community members will be invited to tour both the Friess Lake and Richfield campuses in order to see the facilities that are available. More information will follow after the educator teams have completed walkthroughs of each building.

Consolidation Study
May 2017
